

# MAX OIL BOOSTER S7

PRODUCT  
TECHNICAL  
SHEET

**COMPLETE ENGINE PROTECTION**  
**SLUDGE CLEANER, FRICTION MODIFIER,**  
**ADDITIVE BOOSTER, VISCOSITY STABILIZER,**  
**TBN BOOSTER ALL IN ONE**

## Product Description

TRIAx Max Oil Booster S7 is one of the most advanced engine oil supplements and engine treatments ever made with an extremely wide range of benefits, in virtually every aspect of engine and oil functionality. It is basically an engine treatment on steroids, as well as sludge and carbon deposit cleaner, anti-wear friction modifier, oil viscosity stabilizer, TBN booster, acid neutralizer and corrosion preventer - ALL IN ONE product.

TRIAx Max Oil Booster S7 is the best engine protector and oil booster you can buy, from any brand anywhere in the world. It contains a patented, proprietary formulation of ultra-high performance additives and inhibitors to bring you the most advanced engine protection possible.

## REDEFINING THE MEANING OF ADVANCED ENGINE PROTECTION

### ENGINE SLUDGE CLEANER AND DISPERSANT

TRIAx MAX Oil Booster S7 contains an advanced detergent system, in concentrated form, which rapidly and completely cleans harmful engine deposits such as gunk and sludge from valves, bearings, pistons, crankshaft and all other critical engine parts. It does this in the first 2000 miles you drive on the first treatment. If your vehicle has over 75,000 miles, we recommend you use a 1/5 treat rate on the first use (double the normal) to rapidly dissolve sludge and deposits then change the oil after 2000 miles.

### FRICTION MODIFIER AND MASSIVE ANTI-WEAR BOOST WITH OVER 2000 + ZDDP, ORGANO-MOLYBDEUM AND NANO-BORATES

TRIAx MAX OIL BOOST S7 contains next generation friction modifiers such as molybdeum, boron and over 2000 zinc booster shot, dramatically increasing your oil's ability to reduce engine wear. This product also forms a kind of armor plating on engine parts, protecting the metal from heat, dramatically reducing friction and wear.

### VISCOSITY STABILITY IMPROVEMENT

TRIAx MAX OIL BOOST S7 contains high performance, ultra-stable viscosity stabilizers to keep your oil viscosity stability in line with its specifications.

### TBN BOOST & ACID CONTROL

TRIAx MAX OIL BOOST S7 will boost your oil's TBN by 3 points on the minimum treat rate of 1/10 and can go as high as 6 points on double treat rates of 1/5. This prevents and eliminates the build-up of metal eating acids, eliminating pitting, corrosion and premature wear.

### ENGINE OIL LIFE EXTENDER

Replenishes additives in used oil, greatly extending oil life, and can double or triple your oil change intervals and prevent additive depletion in the final 25% of your oil change interval.

### UNPARALLELED OXIDATION STABILITY

Dramatically reduces oxidation and thickening of motor oil with time. Eliminates cold starting issues and lubricant starvation associated with thick motor oil. Oil oxidation is the Nr. 1 killer of motor oil and the Nr 1 facilitator of high engine wear.

### COMPLETE COMPATIBILITY WITH ALL ENGINE OILS

TRIAx MAX OIL BOOST S7 is compatible with ALL engine oils regardless of specification, mineral, synthetic-blend or synthetic.

### MAXIMUM TURBO-CHARGER PROTECTION

Forms a thermal shield on the turb-charger bearings and dramatically improves the oil's ability to withstand heat, thus preventing the formation of deposits on extremely hot turbo bearings during engine shutdown and in high speed, high power applications.

## Packaging

16 oz (473 ml)  
1 quart (946 ml)  
1 gallon (3.78 L)

# MAX OIL BOOSTER S7

PRODUCT  
TECHNICAL  
SHEET

TEST / Criteria	Value
Appearance	Bright & Cleaner
Color ASTM D1500	4.5
Flash Point (PMCC) Celsius	195
Viscosity cSt @ 40C	90
Viscosity cSt @ 100 C	14
VI	110

## Applications

TRIAX MAX OIL BOOSTER S7 is recommended for use in both heavy duty and passenger engine oils to push engine oil capabilities far beyond original specifications.

Use with ALL motor oils. Mineral, synthetic-blends, full synthetics. Can be used with heavy duty equipment, trucks, pickups, SUV's, racing vehicles and passenger cars.

**DO NOT USE IN TRANSMISSIONS, COOLING SYSTEMS, HYDRAULIC SYSTEMS. THIS PRODUCT IS DESIGNED TO WORK WITH MOTOR OIL AND NOT TO BE USED AS A STAND ALONE PRODUCT INSTEAD OF MOTOR OIL**

### TBN BOOST / ACID NEUTRALIZATION

3 POINT TBN BOOST - 1/10 TREAT RATE

6 POINT TBN BOOST - 1/5 TREAT RATE

Treat rate higher than 1/5 is NOT recommended.

### ANTI-WEAR BOOST: OVER 2000 ZINC, 700 BORON AND 250 MOLY

OPTIMA PROTECTION FOR DAY-TO-DAY - 1/10

RACING / HAULER MAX PROTECTION - 1/5

### OPTIMAL ENGINE CLEANING POWER 1st USE

Treat rate: 1/5 (1 part S7, 5 parts motor oil)

Rapidly cleans engine sludge and carbon desposits. Subsequent treat rates: 1/10 to keep the engine far cleaner than any engine oil is capable of.
